Subject index

ADAPTIVE CONTROL

Adaptive implementation of internal model principle for continuous time systems. G. Feng and M. Palaniswami p167
Adaptive lattice estimation and control of a manipulator with one flexible forearm. Y.-P. Yang and K.-M. Huang p237
Adaptive self-optimising pole shifting control algorithm. O.P. Malik, G.P. Chen, G.S. Hope, Y.H. Qin and G.Y. Xu p429
Design of algorithms for spatial-time reduction complexity of dynamic programming. L. Moreno, L. Acosta and J.L. Sánchez p172
Generalised predictive control (GPC) in the operating theatre. M. Mahfouf, D.A. Linkens, A.J. Asbury, W.M. Gray and J.E. Peacock p404
Multirate adaptive inferential estimation. W. Lu and D.G. Fisher p181
Optimising control of fermentation processes. C. Kambhampati, M.T. Tham, G.A. Montague and A.J. Morris p60
Self-adaptive and self-organising control applied to nonlinear multivariable anaesthesia: a comparative model-based study. D.A. Linkens, M. Mahfouf and M. Abbod p381

BIOMEDICAL APPLICATIONS

Generalised predictive control (GPC) in the operating theatre. M. Mahfouf, D.A. Linkens, A.J. Asbury, W.M. Gray and J.E. Peacock p404

CLOSED-LOOP SYSTEMS

Uncertainty modelling and structured singular-value computation applied to an electromechanical system. M. Steinbuch, J.C. Terlouw, O.H. Bosgra and S.G. Smit p301

COMPUTER-AIDED DESIGN

Intelligent advisory system for achieving diagonal dominance. J. Huang and N. Munro p41

CONTROL EQUIPMENT AND APPLICATIONS

Design of servocontroller via the sliding mode technique. C.L. Hwang p439
Intelligent advisory system for achieving diagonal dominance. J. Huang and N. Munro p41
Uncertainty modelling and structured singular-value computation applied to an electromechanical system. M. Steinbuch, J.C. Terlouw, O.H. Bosgra and S.G. Smit p301

CONTROL SYSTEMS

Approximating irrational transfer functions using Lagrange interpolation formula. P.D. Olivier p9
Architecture for integrated process supervision. R. Leitch and C. Quek p317
Class of stabilising decentralised controllers for interconnected dynamical systems. M. Aldeen p125
Connectionist approach to PID autotuning. A.E.B. Ruano, P.J. Fleming and D.I. Jones p279
Frequency smoothing using Laguerre model. W.R. Cluett and L. Wang p88
Generalisation of conditioning techniques for anti-windup compensators. K.S. Walgama, S. Rönnbäck and J. Sternby p109
Identification of linear time-invariant systems from frequency-response data corrupted by bounded noise. G. Gu and P. Misra p135
Nearly decoupled robust MIMO control systems design. M.H. Perng and T.S. Lee p53
Note on single-term Walsh series method for singular systems. K. Balachandran and K. Murugesan p347
Optimal controller placements in large-scale linear systems. H.-D. Chiang, J.S. Thorp, J.-C. Wang, J. Lu and B. Aubert p79
Performance in sampled data systems. J.F. Whidborne p245
Robust speed control of a pump-controlled motor system. Y. Jen and C. Lee p503
Robust stabilisation of multivariable feedback systems with desired performance requirement. M.-H. Tu and C.-M. Lin p259
Stability of steady-state optimising control systems. J. Lin, I. Gionas and P.D. Roberts p481
Synthesis of pole-zero assignment control law with minimum control input. M.-H. Tu and C.-M. Lin p291

CONTROL THEORY

Adaptive implementation of internal model principle for continuous time systems. G. Feng and M. Palaniswami p167
Adaptive self-optimising pole shifting control algorithm. O.P. Malik, G.P. Chen, G.S. Hope, Y.H. Qin and G.Y. Xu p429
CGPC with guaranteed stability properties. H. Demircioğlu and D.W. Clarke p371
Control of parabolic systems on the basis of the localisation method. V.D. Yurkevich p511
Gain/phase decomposition and generalised predictive control of scalar systems. B. Kouvaritakis, J.A. Rossiter and A.O.T. Chang p97
Graph-theoretic decoupling technique for the design of synchronous generator controllers. L. Carnimeo, M.P. Fanti, M. Trovato and B. Turchiano p337
Integral variable structure control approach for robot manipulators. T.-L. Chern and Y.-C. Wu p161
Note on single-term Walsh series method for singular systems. K. Balachandran and K. Murugesan p347
On the solution of the continuous-time Lyapunov matrix equation in two canonical forms. C.-S. Xiao, Z.-M. Feng and X.-M. Shan p286
Optimal setting for discrete PID controllers. K. Minh Vu p31
Rotor flux observation and control in squirrel-cage induction motor: reliability with respect to parameters variations. X. Roboam, C. Andrieux, B. De Fornel and J.C. Hapiot p363
Simple algorithm for robust pole assignment in linear output feedback. G.-R. Duan p465
Stabilising controller and observer synthesis for uncertain large-scale systems by the Riccati equation approach. W.-J. Wang and C.-F. Cheng p72
Stability of steady-state optimising control systems. J. Lin, I. Gionas and P.D. Roberts p481
Stable generalised predictive control: an algorithm with guaranteed stability. B. Kouvaritakis, J.A. Rossiter and A.O.T. Chang p349
Uncertainty modelling and structured singular-value computation applied to an electromechanical system. M. Steinbuch, J.C. Terlouw, O.H. Bosgra and S.G. Smit p301
Use of bicausal weighting sequences in least squares identification of open-loop unstable dynamic systems. B. Kouvaritakis and J.A. Rossiter p328
Youla parameterised two and a half degrees of freedom LQG controller and robustness improvement cost weighting. M.J. Grimble p147

CYBERNETICS AND ROBOTICS

Orientation planning in continuous path applications for wrist partitioned manipulators. S.D. Voliotis p495
Parallel computation of robot inverse dynamics for high speed motions. A.Y. Zomaya and A.S. Morris p226
Sliding mode control of an electrically powered industrial robot. S.R. Habibi and R.J. Richards p207

DESIGN

CGPC with guaranteed stability properties. H. Demircioğlu and D.W. Clarke p371

FAULT DETECTION

Architecture for integrated process supervision. R. Leitch and C. Quek p317
Fault detection in large-scale stochastic dynamic systems. M.F. Hassan, M.A. Sultan and M.S. Attia p119

FEEDBACK

On the pole assignment of generalised state space systems via state feedback. F.N. Koumboulis and P.N. Paraskevopoulos p106
Single iterative algorithm with global feedback for integrated system optimisation and parameter estimation of large scale industrial processes: optimality, convergence and simulation. Z. Amini, J. Lin and P.D. Roberts p447
Use of bicausal weighting sequences in least squares identification of open-loop unstable dynamic systems. B. Kouvaritakis and J.A. Rossiter p328

FILTERS AND FILTERING

Application of frequency dependent Lyapunov equation to 2-dimensional problems. S. Tzafestas, A. Kanellakis and N. Theodorou p197
Mean regulators for discrete systems. G.P. Liu p67

GENERATORS

Graph-theoretic decoupling technique for the design of synchronous generator controllers. L. Carnimeo, M.P. Fanti, M. Trovato and B. Turchiano p337

INDUCTION MOTORS

Rotor flux observation and control in squirrel-cage induction motor: reliability with respect to parameters variations. X. Roboam, C. Andrieux, B. De Fornel and J.C. Hapiot p363

LOGIC

Self-organising fuzzy logic controller. B.S. Zhang and J.M. Edmunds p460

MATHEMATICAL TECHNIQUES

Design of algorithms for spatial-time reduction complexity of dynamic programming. L. Moreno, L. Acosta and J.L. Sánchez p172
Design of restricted complexity digital regulators using explicit criterion minimisation. O.A. Sebakhy and H.A. Murad p251
Improved Wolovich algorithm for determining state-space representations of linear multivariable polynomial systems. D. Westreich p267
Multirate adaptive inferential estimation. W. Lu and D.G. Fisher p181
Note on single-term Walsh series method for singular systems. K. Balachandran and K. Murugesan p347
On the solution of the continuous-time Lyapunov matrix equation in two canonical forms. C.-S. Xiao, Z.-M. Feng and X.-M. Shan p286
Polynomial optimisation of discrete-time multivariable regulators. K.J. Hunt p190
Recursive state and parameter estimation of SISO singular systems. M. Darouach and M. Boutayeb p204
Single iterative algorithm with global feedback for integrated system optimisation and parameter estimation of large scale industrial processes: optimality, convergence and simulation. Z. Amini, J. Lin and P.D. Roberts p447

MULTIVARIABLE CONTROL SYSTEMS

Controller design for linear multivariable systems with periodic inputs. C.-A. Lin and S.-J. Ho p1
Expert aided sequential design of multivariable systems. J.-M. Boyle and J.M. Maciejowski p471
Intelligent advisory system for achieving diagonal dominance. J. Huang and N. Munro p41
Multivariable adaptive pole-assignment controller with saturation constraints. A. Arruti and J. Flórez p13
Nearly decoupled robust MIMO control systems design. M.H. Perng and T.S. Lee p53
Polynomial optimisation of discrete-time multivariable regulators. K.J. Hunt p190
Robust identification of systems using block-pulse functions. H. Dai and N.K. Sinha p308
Robust stabilisation of multivariable feedback systems with desired performance requirement. M.-H. Tu and C.-M. Lin p259

NOISE AND INTERFERENCE

Application of frequency dependent Lyapunov equation to 2-dimensional problems. S. Tzafestas, A. Kanellakis and N. Theodorou p197

NONLINEAR SYSTEMS

Design of output tracking via variable structure system: for plants with redundant inputs. Y-C Chen, P-L Lin and S Chang p421

OPTIMAL CONTROL

Design of algorithms for spatial-time reduction complexity of dynamic programming. L. Moreno, L. Acosta and J.L. Sánchez p172

LOG optimal control design for uncertain systems. M.J. Grimble p21

Optimal controller placements in large-scale linear systems. H.-D. Chiang, J.S. Thorp, J.-C. Wang, J. Lu and B. Aubert p79

Youla parameterised two and a half degrees of freedom LQG controller and robustness improvement cost weighting. M.J. Grimble p147

OPTIMISATION

Adaptive self-optimising pole shifting control algorithm. O.P. Malik, G.P. Chen, G.S. Hope, Y.H. Qin and G.Y. Xu p429

Optimising control of fermentation processes. C. Kambhampati, M.T. Tham, G.A. Montague and A.J. Morris p60

Polynomial optimisation of discrete-time multivariable regulators. K.J. Hunt p190

Simple algorithm for robust pole assignment in linear output feedback. G.-R. Duan p465

Single iterative algorithm with global feedback for integrated system optimisation and parameter estimation of large scale industrial processes: optimality, convergence and simulation. Z. Amini, J. Lin and P.D. Roberts p447

POLES AND ZEROS

On matched pole–zero discrete-time models. N. Hori, R. Cormier and K. Kanai p273

Synthesis of pole-zero assignment control law with minimum control input. M.-H. Tu and C.-M. Lin p291

Use of bicausal weighting sequences in least squares identification of open-loop unstable dynamic systems. B. Kouvaritakis and J.A. Rossiter p328

POWER SYSTEMS AND PLANT

Fault detection in large-scale stochastic dynamic systems. M.F. Hassan, M.A. Sultan and M.S. Attia p119

PROCESS CONTROL

Architecture for integrated process supervision. R. Leitch and C. Quek p317

Data validation using orthogonal filters. J. Ragot, D. Maquin and D. Sauter p47

Optimal setting for discrete PID controllers. K. Minh Vu p31

Optimising control of fermentation processes. C. Kambhampati, M.T. Tham, G.A. Montague and A.J. Morris p60

SIMULATION

Class of stabilising decentralised controllers for interconnected dynamical systems. M. Aldeen p125

Model validation by the distortion method: linear state space systems. R.G. Cameron p296

Rotor flux observation and control in squirrel-cage induction motor: reliability with respect to parameters variations. X. Roboam, C. Andrieux, B. De Fornel and J.C. Hapiot p363

STABILITY

CGPC with guaranteed stability properties. H. Demircioğlu and D.W. Clarke p371

Discrete time system stability analysis using polynomial arrays. X. Hu, H. Yee and T.S. Ng p395

TRANSIENTS

Control of distributed parameter systems: localisation method. V.D. Yurkevich p141
